RESCUE AND REHABILITATION OF STRAY ANIMALS FOUNDATION  
AN ANIMAL WELFARE ORGANIZATION  
ANAND, GUJARAT

## MESSAGE FROM FOUNDER

**Dr. Bhavesh**

I have always had a soft corner for mute animals right from my childhood. I'd run to treat any injured or sick stray animal reported in the city without thinking twice and would always raise voice in favor of speechless creatures in any case of animal cruelty.

This was my daily routine and I continued it for 12-15 years. I'd always think that, "it gives me satisfaction and a peaceful sleep at the end of the day thinking that I made my contribution for the welfare of mute animals, but what after I die? Who'd look after these mute creatures? What's my long term achievement for their betterment?"

I did MBA and then cleared UGC-NET to get a government job as a professor. Because of my interest towards research, I have also done Ph.D. I was always in a mood to get a government job and settling down but my willingness to build an infrastructure for the poor and mute animals took over my secure thought of settling down for a non-challenging and simple life and then my journey towards building an animal hospital and shelter began

I faced a lots of difficulties In the beginning. Enough funds couldn't be raised even to built the boundary of the land. But it is truly said that when one is involved in an act of kindness with pure intentions, the invisible universal energy will always support. As the infrastructure started to grow, more and more people came forward to support and help. And I am glad to write it here today, that I have successfully built a facility of animal hospital and animal shelter in Anand city where 150 animals can be accommodated at a time for treatment, different blocks and space to admit animals like dog, cat, goat, pig, donkey and birds are also available. This infrastructure has facilities of medicine stock room, x-ray, USG, blood reports, animal food storage room, an OT for performing minor/major surgeries, accommodation for caretaker staff, office and two ambulances providing on-site treatment to injured animals of town, with 15 fulltime employees working for the cause. I had a wish that no sick/injured animal should have to wander around and that they should get quality treatment, enough rest, healthy food and lots of love under one roof.

### OUR MISSION

To provide timely quality treatment to all injured and sick ownerless stray animals and birds.

### OUR VISION

To build infrastructure like Animal Shelter, Animal Hospital, Animal Ambulances with qualified team of veterinary doctors in each city of Gujarat as these mute animals deserve healthier and safer life.

### IMPACT OF THE YEAR 2023-24

Rescue & Treatment	<b>4370</b>
Animal Admission	<b>819</b>
Surgeries & Sterilization	<b>710</b>
Vaccinations	<b>3800</b>
Awareness Campaigns	<b>20</b>
Adoptions	<b>22</b>

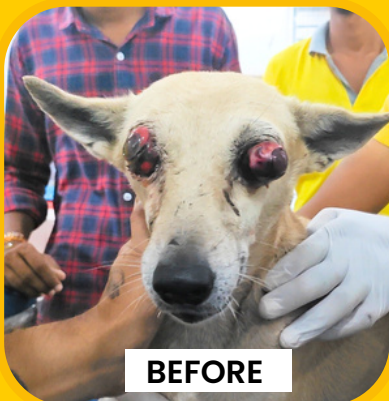

## Spreading Kindness to every single living soul

A human orthopaedic surgeon along with our vets performed a surgery of needy stray dog. A renowned Orthopedic Surgeon Dr. Atit Kantawala joined our vets to perform a surgery of stray dog having complete fracture to his front leg. Due to some road accident this dog got a complete open fracture, we carried out his surgery successfully.

During chilling winter outside, our babies had their cozy beds and heating bulbs to keep them warm.

BEFORE

NOW

### SANNE Hurt to Heal

Someone had beaten Sanne with a stick, both her eyes were popped out. She underwent further treatment including surgery. Now she is permanently blind and hence staying with us forever.

## Jimmy

We rescued Jimmy in terrible condition, she was malnourished, all her bones were visible, she had infection to her ears, paws, tail and on full body. She was not able to stand and even eat by herself, we treated her for three months and finally she started showing improvement.

## 11th YEAR OF BIRD RESCUE CAMP

Our in-house facilities of rescue, treatment, surgeries and admission for injured birds help them fly back to sky

## Goldie

Goldie's parents were taken away by slaughters, that's when she was left unprotected on streets and the dogs attacked her.

Her abdomen was ruptured and intestines were hanging out. Now she is completely recovered and permanently living at Aashiyana

## Gauri

We rescued her from some busy road with lots of traffic, she was roaming around without her owner or mother and finally we brought her at shelter and provided her a permanent happy home.

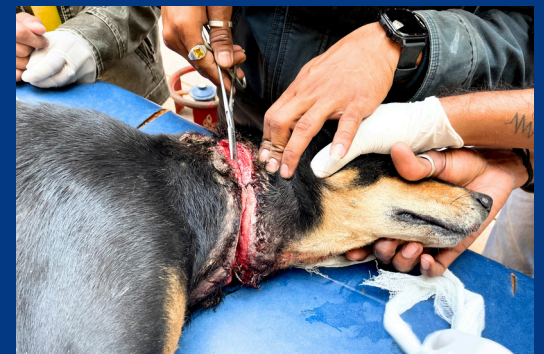

## Romi

Someone slit her body from head to back, and gradually that part started getting infected.

Romi was taking shelter at some abandoned house, she hardly used to go outside to find food as she was highly scared with the cruel human beings around that made her suffer.

But finally someone saw her and reported on our helpline, we rescued her and started her treatment.

Now Romi is completely fine, thank you so much to the people who donated for her treatment, you made a huge difference in her life.

## Pavitra

Someone tied an iron wire on her neck, and that wire was literally choking her. Timely help from RRSAINDIA helped her to live her second inning.

Delivered a speech on Animal Welfare at NSS camp conducted by **CHARUSAT University**.

We explained students about importance of animals in our ecology and also taught first aid of animals. It was a really interactive session

## STERILIZATION

Human Welfare through Animal Welfare, this is how we establish harmony between humans and animals

Why should we only think for their necessity? they also deserve to celebrate.

## CELEBRATION

Seasonal Preparation, protecting our shelter buddies against cold and heatwaves

## WINTER

## SUMMER

## BEFORE

## NOW

# RESCUES AT GLANCE

## AWARENESS CAMPAIGNS

We held seminars and workshops at various colleges, such events can help young generation to become compassionate to locality animals

## VACCINATION AND COLLAR DRIVE

We started vaccinating the dogs with Anti Rabies to eradicate Rabies- a deadly virus. Also to prevent road accidents, injuries and deaths of Humans as well as dogs, we started fixing reflective collars to dogs.

## ADOPTION

We always believe in Adoption, so that needy animals can get loving forever home to stay, we have special protocols to complete the adoption procedure for the wellbeing of needy animals

# SARA IMAGING FACILITY

X-ray and USG is an infrastructural facility which is needed quite frequently to carry out accurate diagnosis of injured/ sick animals. We are glad to announce that we inaugurated both these facilities at our animal hospital. This facility will now help innumerable stray animals to get accurate diagnosis followed by appropriate treatment.

## TWO AMBULANCES

We are always dedicated to growing the infrastructural facilities for speechless animals. After the breakdown of our old rescue vehicle, we proudly inaugurated two new ambulances for small and large animals each, now running for the welfare of sick and injured stray animals.

## Waterbowls Project

Every year thousands of animals and birds die in summer due to unavailability of pure drinking water. We started an initiative to distribute large water bowls during summer season for birds and animals like dogs and cows. This Project is supported by Ashraya Hastha Trust, Bangalore.

**Getting pure drinking water is a right of every living beings.**

# Partnership

It is a pride moment for us to have a wonderful partnership with Ashraya Hastha Trust, Bangalore.

# INSPIRING VOLUNTEERS

WE inspire youngsters to volunteer for a cause, this is how we can form kind citizens and built better future

# MEDIA COVERAGE

The Dodo, one of the biggest American media brands and digital publisher published our rescue stories on their platforms. The Dodo is headquartered in New York City.

**SARAH PEKKANEN** - an internationally and USA Today bestselling author of several novels along with Rachel Stuart- a Jamaican-Canadian model, actress and television personality travelled all the way from US to specially visit us and meet our babies, we have no words to express our joy!

**Shraddha Musle**, an actress who worked with famous TV serial CID as Dr. Tarika, visited our animal shelter. She met all our shelter babies and interacted with all our staff people.

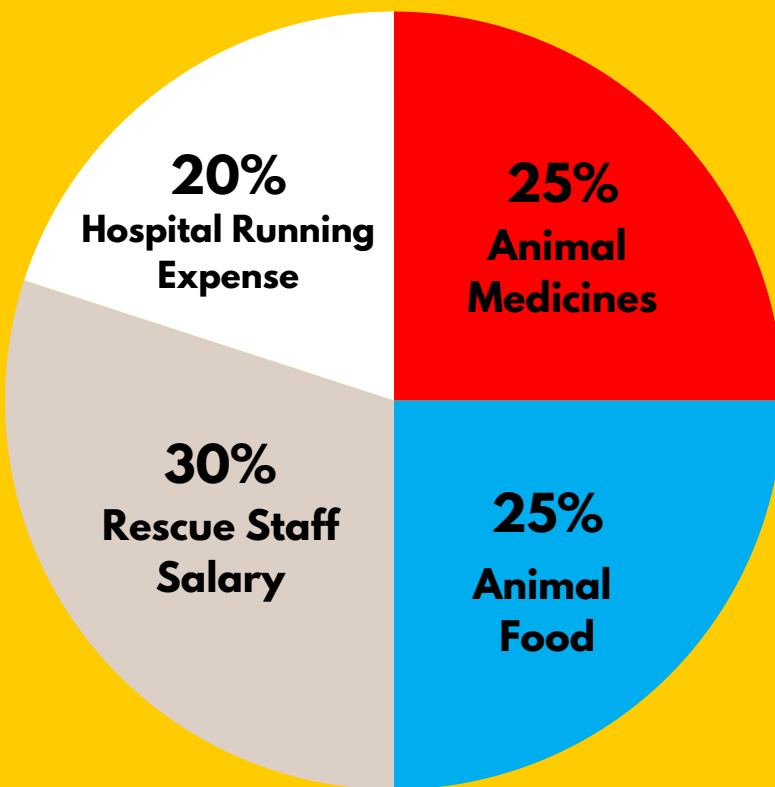

# OUR TEAM

The team of real heroes working on ground to provide timely treatment, care and lots of love to speechless animals

## WHERE WE SPEND YOUR DOANTION

Our average **monthly expenditure** to carry out animal rescue activity is **4,00,000/-**. You can find the breakdown in the pie chart here.

You can donate us any of the above mentioned heads.

### You can feed shelter animals, How?

Feed injured and sick animals at our shelter on different occasions like

- **Anniversary**
- **Birthday**

**FANS ON EACH DOG ROOMS**

**BOUNDARY AND FENCING**

**ROOMS FOR BIRDS**

# Inaugurated

## INHOUSE PATHOLOGY LAB FOR ANIMALS

An animal pathology laboratory specializes in diagnosing diseases and conditions affecting animals. Through careful analysis of tissue samples, bodily fluids, and cells, veterinary pathologists and technicians identify illnesses ranging from infections to cancer in animals and wildlife.

Recently, with the CSR support of Koch Engineered Solutions, we have established an in-house Pathology Laboratory capable of performing blood and urine analysis, including parameters such as CBC, KFT, LFT, and many more.
